

Plan your inspection

Use for a proposed sourcing or standalone inspection assignment. Availability, inspection scope and costs require confirmation.

FIELD	COMPLETE FOR THIS PROJECT
Company / requester / role	
Email / telephone	
Destination country / intended market	
Factory name and full location	
Factory contact / access arrangements	
Product / purchase order reference	
Order quantity and production stage	

01 / REQUESTED ASSIGNMENT

- ☐ Pre-production review
- ☐ During-production inspection
- ☐ Pre-shipment inspection
- ☐ Loading observation
- ☐ Other: _____

FIELD	COMPLETE FOR THIS PROJECT
Requested date / scheduling constraints	
Specification revision / approved sample	

Continue on page 2 with the proposed quality plan. Send the request and supporting specifications via sialsourcing.com/qc-inspection-request or info@sialsourcing.com.

Define the scope

Product / order reference: _____

02 / PRODUCT-SPECIFIC PLAN TO AGREE

FIELD	COMPLETE FOR THIS PROJECT
Required checks / applicable methods	
Lot definition / quantity available	
Sampling standard and edition (if used)	
Inspection level / sampling method	
Defect classes and acceptance criteria	
Sample size / acceptance numbers (to agree)	
Tests, instruments or specialist provider	
Report format / photos / measurements	

Key concerns, exclusions or access limitations

The sampling plan must suit the product and order. AQL alone is not a complete plan. Sampling does not establish that every unit is defect-free. Laboratory testing and market documentation review are separate scopes where required.
